THE first rule a newspaper reporter learns is to answer five basic questions in the lead of his story: Who? What? When? Where? Why? It is a rule equally good for all people in buying goods. In the answers to those five questions lie the fundamental facts you should know about every article you pur-

Who made it? Is he reliable? Is he experienced? Will he be in business if the article needs repair or replacement?

What will the article do for you? Will it improve your appearance? Will it save you time, money, effort? Will it make you more comfortable, more happy?

When was it made? Designed? Packed? Is it fresh? Is it the newest model, or latest development

Where can you buy it? Does your own store carry it? If not, can you place dependence in the store that does?

Why should you buy it in preference to some similar product? Is it superior in design, materials, workmanship? Will it fit your needs more closely?

The answer to these questions, and others, are contained in the advertisements here. They are set forth by manufacturers and merchants for your convenience and guidance. The advertisements are interesting and sincerely written. They contain information you want to know, and should know, before you make purchases. You will find it worth while to follow them,

Charity Work at Hospital

Charity cases cost the East Liverpool City hospital association approximately \$10,000 annually, and to meet this expense the municipality provides only \$5,000 through taxation, it was pointed out by J. to the expense of treating patients whose finances will not permit payment of the moderate rates, the association has been unable to accumulate a surplus except through gifts and bequests. Thanks to the generosity of East Liverpool district pottery manufacturers, business and professional men, an addition and purchase needed equipment.

For this reason, the trustees have adopted the tax plan as a solution of the problem. Its approval comfort of the suffering.

Your vote on the proposal, as Trustee Thompson told church leaders, will determine what kind of a hospital East Liverpool shall have. Interest in the welfare of the sick and suffering should prompt support of the proposal.

It goes into them in proper condition for its use there. Unfortunately, neglect of the

nose, failure to get rid of colds and improper care of the body may result in disease of the nasal tissues. In consequence the mucous membrane becomes swollen and ab normally thickened.

When the nasal tissues are inflamed the glands contained within it become overactive. They throw out quantities of thick mucus. This serves to clog the nose still more. The swollen tissues and the mass of mucus make it impossible to get air through the nose. Then there results what is called "mouth breathing." Instead of passing through the nose for warming and cleansing, the cold air, filled with dirt and other impurities, is taken through the mouth into the throat and lungs.

Sore throat, laryngitis, bronchitis and even more serious aliments are produced in this way. The health suffers in consequence.

The Cow is off the Track!

AN ANCIENT PREJUDICE HAS BEEN REMOVED

Railroads have safely passed those danger signals of prejudice which caused folks to look upon them with fear. Holding aloft the semaphore of progress AMERICAN INTELLIGENCE cleared the track and, today, millions travel in ease and security.

"toasting did it"-

Gone is that ancient prejudice against cigarettes—Progress has been made. We removed the prejudice against cigarettes when we removed harmful corrosive ACRIDS (pungent irritants) from the tobaccos.

TTEARS ago, when cigarettes were made without the aid of modern science, there originated that ancient prejudice against all cigarettes. That criticism is no longer justified. LUCKY STRIKE, the finest cigarette you ever smoked, made of the choicest tobacco, properly aged and skillfully blended—"It's Toasted."

"TOASTING," the most modern step in cigarette manufacture, removes from LUCKY STRIKE harmful irritants which are present in cigarettes manufactured in the old-fashioned way.

Everyone knows that heat purifies, and so "TOASTING"-LUCKY STRIKE'S extra secret process-removes harmful corrosive ACRIDS (pungent irritants) from LUCKIES which in the old-fashioned manufacture of cigarettes cause throat irritation and coughing. Thus "TOASTING" has destroyed that ancient prejudice against cigarette smoking by men and by women.

CIGARETTES

"It's Toasted"—the phrase that describes the extra "toasting" process applied in the manufacture of Lucky Strike Cigarettes. The finest tobaccos—the Cream of the Crop—are scientifically subjected to penetrating heat at minimum, 260°-maximum, 300°, Fahrenheit. The exact, expert regulation of such high temperatures removes impurities. More than a slogan, "It's Toasted" is recognized by millions as the most modern step in cigarette manufacture.

To Stop Hosiery Fading Even When Ordinary Laundry Soap Is Used

Simple Way To Stop Fade and "Soap Eat" In Even Most Fragile Hosiery

You need no longer fear the fading of delicate colors in even the most fragile chiffon hosiery. You avoid, too, the "soap eat" that hosiery makers warn against. There's a new way of washing that prevents all this . . . even when the ordinary laundry soaps or powders are used.

Under the new method described here, even faintest pastel colors in fine lingerie or delicately tinted hosiery hold fast, according to recent tests, for as many as 50 washings, without noticeable fade or wear.

The method is very simple: To each tubful of water (or washer filled to the water line) you merely add 2 tablespoons of a preparation called CLIMALENE and ise just ONE-FOURTH the quantity of soap you ordinarily use. Then proceed with washing as usual. (For light wash-ing in small wash basins, a teaspoonful of CLIMALENE is enough.)

There probably are harder things than to try to fill the job of a man who won six pennants and three world series since 1921. of a man who won six pennants and three world series since 1921. There is, for instance, the business of trying to jump from the thirty-eighth story. As a rule, this doesn't work. Full well do I remember the last man who tried it. He jumped beautifully; as a matter of fact, it wasn't even neccessary for him to ask for a practice jump. Nevertheless he failed. It seems that he had eaten a lot of cucumbers and, of course, the poor fellow died of a broken heart.

This case is cited simply to show that there are harder things to try than that which Mr. Shawkey's first move tomorrow, it is said, will be to go into conference with Ed Barrow and Bob Connery, of St. Paul, to complete arrangements for the recall of "Dusty" Cooke and Ben Chapman.
